

Student Challenge:

Design the ultimate urban greenhouse

Students are being challenged to submit an urban greenhouse design which brings professional food production into urban neighbourhoods, connects it with local energy systems and encourages citizens to engage with sustainable production and consume healthy food.

Pre-registration: 1st and 31st October 2017

Final registration date: 30 November 2017

WAGENINGEN
UNIVERSITY & RESEARCH

100years
1918 — 2018

Wageningen University & Research is organizing a Challenge to Design the Ultimate Urban Greenhouse

Who for? Students in relevant fields at universities or universities of applied sciences around the world

What's the challenge? Submit an urban greenhouse design which brings professional food production into urban neighbourhoods and encourages citizens to engage with sustainable production and consume healthy food. Spark the future, improve the quality of life!

When's this happening? Register by 30 November 2017 latest. You will present your design for an expert jury during the last week of August 2018.

What's next: Start putting together your interdisciplinary dream team now and get ready to Design a Sustainable Urban Greenhouse.

What's it about?

Your entry will be assessed on topics such as:

- greenhouse design
- plant production system
- citizen inclusion
- contribution to the circular economy
- renewable energy
- spatial design
- business model
- ICT use
